

ABOUT US

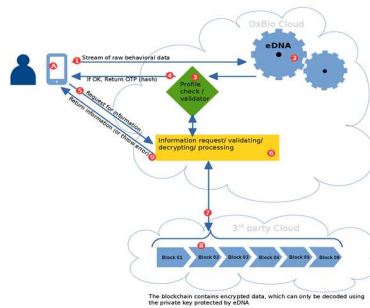

Enormous opportunities in e-Commerce, Digital Advertising and Publishing inevitably attracted nefarious players to the internet. Spam, Fake News, Ad Fraud, Credit Card Theft and Loss of Privacy have invaded the ecosystem on which we all rely. How do you balance the good from the bad? What's the level of Fraud or Privacy invasion that's acceptable? We believe the answer is none. From its inception at the Oxford University Innovation Center,

OXFORD BIOCHRONOMETRICS has sought to provide the highest level of security without Invasion of Personal Privacy. We will continue to build upon our proprietary technology to solve these problems, and to tackle related issues as they arise, while also applying the core technology to vastly increase the security around the Blockchain that's increasingly integral to internet-based commerce.

OUR TECHNOLOGY

We have developed proprietary Human Recognition Technology, (HRT) that creates a unique biometric authentication mechanism (e-DNA) for anyone – or any *thing* – that interacts with our embedded code.

OXFORD BIOCHRONOMETRICS HRT determines definitively which interactions are human-derived and which are not, with independent studies having validated that our technology catches more fraud than alternatives that represent the current standard. Our technology is so advanced that NATO announced OXFORD BIO-CHRONOMETRICS as a winner of the agency's 2017 Defense Innovation Challenge, characterizing the technology as "transformational and state-of-the-art."

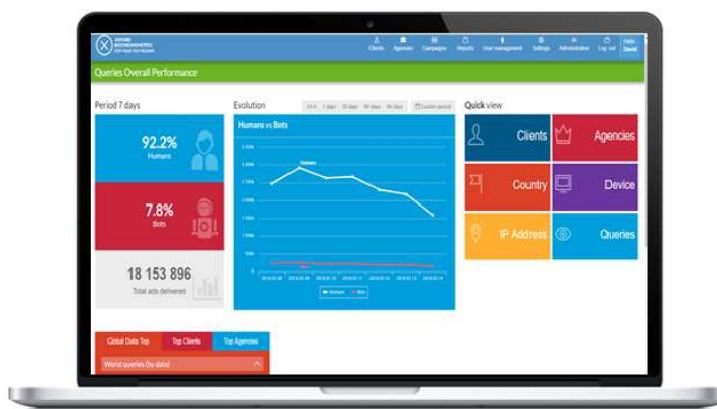

OUR SOLUTIONS

Digital Media Solutions are OXFORD BIO-CHRONOMETRICS products that identify non-human (bot) digital advertising fraud - these tools and services empower advertisers to ensure publisher traffic integrity. And to pay only for traffic that matters.

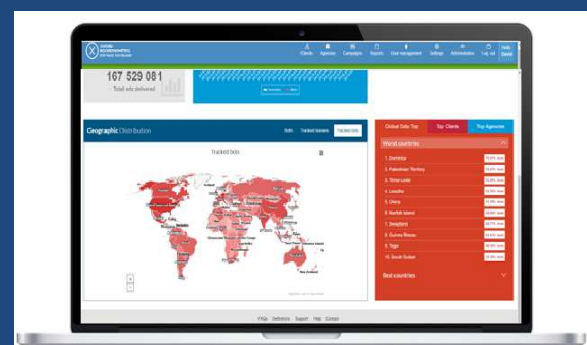

- **SecureAd** Suite of products;
 - **SecureAd** Impressions
 - **SecureAd** for Search
 - **SecureAd** for Video
 - **SecureAd** for Agencies
 - **SecureAd** for Advertisers

Cyber Solutions are OXFORD BIO-CHRONOMETRICS products that prevent fraud from happening in the first place.

- **SecureForm** (formerly **NoMoreCaptchas**), thousands of websites globally using this product to prevent spam and to block invalid user activity.
- **SecureLeads** uses Oxford BIO's Human Recognition Technology to verify that a human has filled out a lead/contact/signup form.
- **Secure Checkout** detects non-humans interacting with payments pages, and blocks attempts at fraudulent credit card purchases.

SECUREAD DASH OVERVIEW

OUR CLIENTS SAY

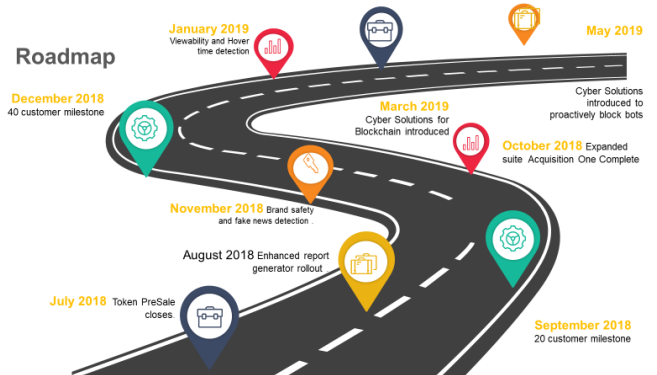

Oxford has FINALLY solved a giant problem that has been plaguing us for years, WITHOUT ticking off our website users.

Oxford BioChronometrics has given us the ability to pinpoint dozens of data points for each individual pageview and helped us identify fraudulent traffic and take the necessary steps to weed it out ;-)
Thanks!!

ROADMAP

The company plans:
Rollout new features within SecureAd product.
-Develop additional security solutions.
-Hire and acquire to grow team, footprint and distribution -
Develop new security measures for Blockchain.

With sufficient funds from Token sale we will begin work on SecureChain, adding our HRT and e-DNA technology to secure Blockchain.

TOKENS

200 million utility tokens will be offered

- Release 1: 1-40,000,000 will be priced at 41% discount (private pre-sale)
- Release 2: 40,000,001-80M will be priced at 33% discount
- Release 3: 80,000,001-120M will be priced at 25% discount
- Release 4: 120,000,001-160M will be priced at 20% discount
- Release 5: 160,000,001 -200 will be priced at \$0.24

Use in system: Redemption value against services at \$0.30 per token

TEAM

David Scheckel
Founder CEO
David has the drive and

experience to create a working business around a concept to bring maximum value to the market.

[linkedin.com/in/david-scheckel-69441b41](https://www.linkedin.com/in/david-scheckel-69441b41)

Sander Kouwenhoven
Founder CTO

Sander captures biological and behavioral patterns and turns visions into production ready products.

[linkedin.com/in/sander-kouwenhoven-a201061](https://www.linkedin.com/in/sander-kouwenhoven-a201061)

Adrian Neal
Founder CSO

Passionate about the encryption schemes in history and applies that passion to developing new code to protect the internet.

[linkedin.com/in/adrianeal](https://www.linkedin.com/in/adrianeal)

Peter Keller
CHIEF REVENUE OFFICER

His recent work incubating start-ups around the world gives him the insight to the true needs of our market.
